

MEMS testing machines have been developed for customers requiring refined automation that is adaptable and reliable. Acoustic testing of MEMS or other leading process technologies for microphones has been accomplished in a single system solution. Small foot print devices 2 sq. mm . Systems are supported by a global network of IEF Werner support.

MEMS Testing and Handling Systems

New Product and Capabilities

Features

- Manual to Fully Automated
- Acoustic Test Chambers
- Continuous closed loop handling
- Precise micro Dut positioning
- Very high through-put
- Bowl Feeding
- Tray Handling
- Tape & Reel
- Vision Inspection

Advantages

- Package Change Over Kits
- Proven Software Control
- Easy Maintenance access
- Flexible
- Integrated Tester Equipment
- Minimal Foot Print
- Industrial Automation Controls
- 10,000 UPH or more...
(Depending on testing time)
